# Meet Structural WorkSuite

Everything you need to analyze and design industrial structures and buildings in one complete, convenient, and affordable suite.

Design codes are becoming more complex and structures are becoming more intricate. Can your software handle these challenges? Focus on design rather than keeping up with software from multiple vendors. Rest assured with proven applications rather than worrying about risky oversights. Deliver code-compliant designs, increase safety, and enjoy **30% time savings.**
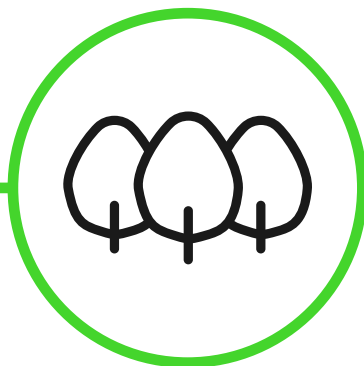

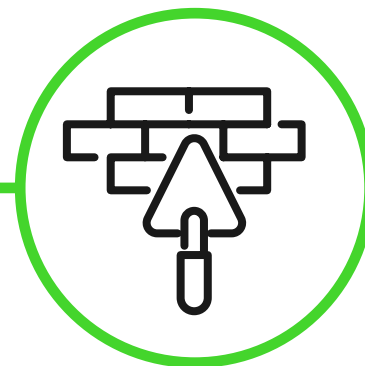

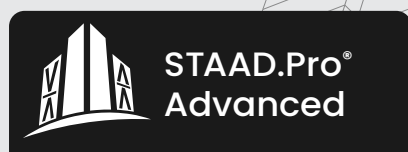

Cover a Wide Range of Structural Elements
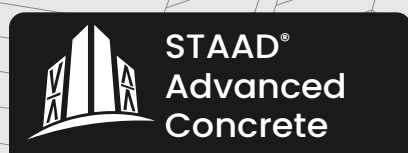

Concrete **Steel** **Timber** **Masonry**

Structural WorkSuite Provides All This

STAAD.Pro® Advanced
Comprehensive structural finite element design and analysis

STAAD® Advanced Concrete
Concrete design for STAAD

STAAD® Foundation Advanced
Foundation design and analysis for STAAD

iTwin® Analytical Synchronizer
Digital twin for structural design information and collaboration

Structural WorkSuite

RAM® Structural System
Specialty analysis and design for building structures

RAM® Concept
Post-tensioned and conventionally reinforced concrete slabs

RAM® Elements
Modules for other structural components and more

RAM® Connection
Steel connection design and detailing

+ Support Training Mentoring

Enjoy the Benefits

Reduce Costs
- Benefit from **more** analysis tools and design codes **for less**
- Ensure the **most cost-effective** design without sacrificing safety

Save Time
- Produce optimized designs you can trust with **30% time savings**
- Get support **when you need it**

Simplify
- Make your workflow easier with **just one** solution
- Use the applications **you want, when you want**

Bentley®
